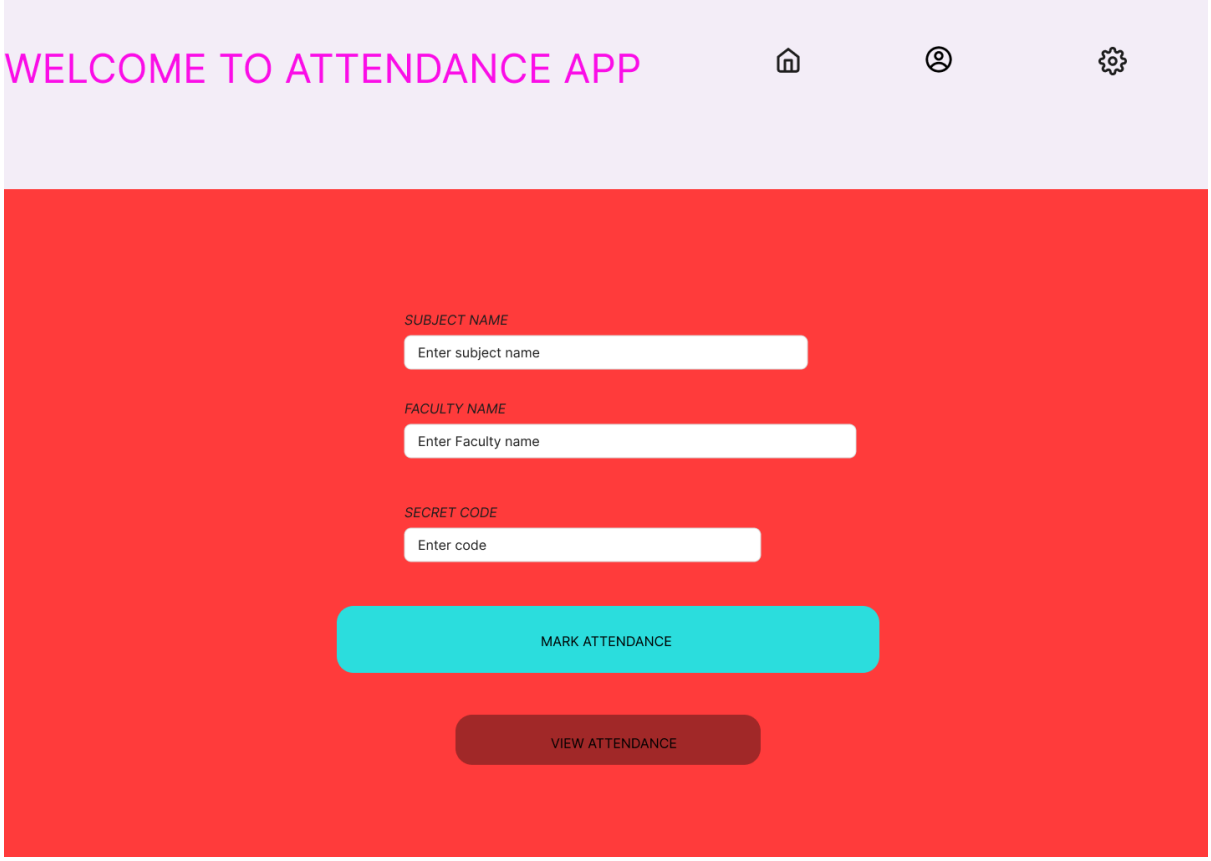
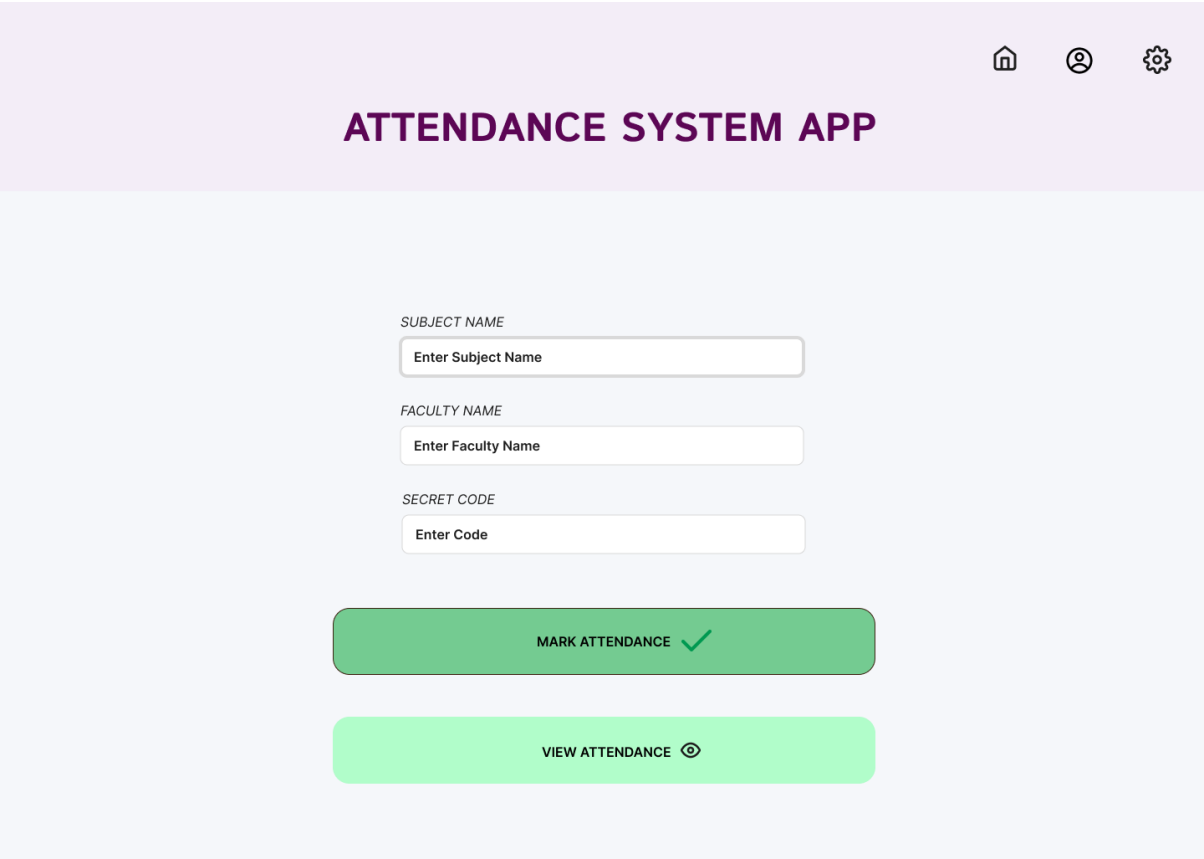
ROLL NO : 240701436

COMPARSION OF UI DESIGN BETWEEN TWO FIGMA CREATION

BAD DESIGN :



GOOD DESIGN:



KEY PROBLEMS – BAD DESIGN :

- **DESIGN STYLE** :
  - Uses bright and harsh background colors (red).
  - Poor color contrast between text and background.
  - Layout looks cluttered and unbalanced.
  - No visual hierarchy to guide the user.

- **CONTENT :**
  - Input fields are placed without proper spacing.
  - Labels are small and not clearly visible.
  - Text is difficult to read due to poor contrast.
  - Buttons are not visually distinguished properly

- **NAVIGATION :**
  - Icons are present but their purpose is not clearly understood.
  - No proper alignment of navigation elements.

- **USABILITY** :
  - Bright background causes eye strain.
  - Poor visual hierarchy makes it hard to focus.
  - No feedback or guidance after clicking buttons.
  - User experience is not friendly for first-time users.

- **PURPOSE** :
    - Design focuses only on functionality
    - Does not consider user comfort or accessibility.

KEY STRENGTHS – GOOD DESIGN :

- **DESIGN STYLE** :
    - Uses a clean and minimal layout.
    - Soft and professional color combination improves readability.
    - Proper alignment and spacing give a neat appearance.
    - Balanced use of colors enhances visual appeal.

- **CONTENT :**
    - Input fields are clearly labeled and easy to understand.
    - Proper spacing between elements improves clarity.
    - Text is readable with good font size and contrast.
    - Buttons are clearly visible and well positioned

- **NAVIGATION :**
    - Icons are neatly aligned and easy to recognize.
    - Simple and user-friendly navigation.
    - User can easily understand the flow of actions.

- **USABILITY** :
    - Clean interface reduces confusion.
    - Good color contrast improves accessibility.
    - Buttons clearly indicate actions like “Mark Attendance” and “View Attendance”.
    - User-friendly design suitable for first-time users.

- **PURPOSE** :
    - Designed to provide a smooth attendance marking experience
    - Focuses on usability and clarity.
    - Suitable for real-time academic or institutional use.

KEY DIFFERENCES :

- **Focus**:
  The bad design focuses only on functionality, while the good design focuses on both usability and user experience.

- **Design Aesthetics:**
  The bad design uses harsh colors and poor layout, whereas the good design uses soft colors, proper spacing, and a clean interface.

- **Content Presentation:**

  The bad design has poorly arranged input fields and unclear labels, while the good design presents information clearly with proper alignment and readability.

- **Navigation:**

  The bad design has unclear navigation and icon placement, whereas the good design provides a simple and well-structured navigation flow.

- **User Experience:**

  The bad design may confuse users due to clutter and poor contrast, while the good design offers a smooth and user-friendly experience.

- **Purpose:**

  The bad design only serves basic functionality, whereas the good design focuses on efficiency, clarity, and ease of use for attendance management.
